ABOUT ME

Simret Negash is a dedicated and versatile full-stack developer with strong technical expertise and a strong interest in creating stable, user-friendly, and sustainable solutions. She has worked in project environments focusing on both frontend and backend development and has experience with both open-source technologies and enterprise environments.

She is proficient in modern frameworks and technologies such as React, Angular, Node.js, TypeScript, PHP, and ASP.NET Core, as well as databases such as MySQL and MongoDB. At ITeGAMAX, she has worked with ASP.NET Razor Pages and Entity Framework and has contributed to everything from database design to the implementation of backend functionality and APIs.

Simret is accustomed to working in agile teams and collaborating closely with both designers and developers to ensure high quality in both user experience and technical architecture. She is analytical, solution-focused, and structured, with the ability to quickly learn new technologies and deliver stable and sustainable solutions in complex environments.

EXPERIENCE

Full-Stack Developer

Oct 2024 - Present

ITeGAMAX

- Developed web applications in C# and ASP.NET with a focus on admin panels and user management (CRUD).
- Improved database structure and performance using Entity Framework Core and Fluent API.
- Built responsive frontend interfaces with Razor Pages (CSHTML) and Bootstrap 5.
- Used Azure DevOps for code reviews, version control, and CI/CD pipelines.
- Worked in an agile environment and deepened my understanding of technical collaboration and scalable solutions.

EDUCATION

Full-Stack Web Developer

Sep 2023 - Jun 2025

Chas Academy, Stockholm

Assistant Nurse

Aug 2015 - Mar 2017

Bruksgymnasiet, Gimo

SKILLS

Languages & Frameworks: React.js • Node.js • ASP.NET • Razor Pages

Databases: MongoDB • MySQL • Azure SQL • Firebase • Firestore

Backend & APIs: REST APIs • CRUD • Authentication (JWT, OAuth)

DevOps & Version Control: Azure DevOps • Git & GitHub • CI/CD • Netlify • Vercel • Firebase Hosting

Ways of Working: Agile methods (Scrum, Kanban) • Jira • Team collaboration

COURSES & TECHNICAL STUDIES

Courses

ASP.NET MVC (2024), C# (2024), React.js (2024), Node.js (2024)

CI/CD (2024), Python (2024), Jira (2024)

JavaScript (2023), PHP & Databases (2023), Web Servers & MVC Structure (2023)

Laravel & APIs (2023), Git & GitHub (2023), C (2020)

Cloud Services & Hosting

Firebase (2024), Azure Storage (2024), Netlify / Vercel (2023)

LANGUAGES

Swedish: Fluent • **English:** Fluent • **Tigrinya:** Native
